

Epoxy Coated Shelving is the Green Choice

As industry experts, we know homebuyers and residents expect high-quality storage and organization solutions that are also safe. Healthy homes have gained momentum as residents focus on their living spaces being free of harmful toxins. **Organized Living ensures all products are designed and manufactured responsibly and without releasing harmful VOCs into the environment.** If health, sustainability, and product quality are important to you and your customers, then choosing Organized Living wire ventilated shelving is the right choice.

Epoxy Coated Shelving

Durability

- Resists chipping, scratching and corrosion
- Smooth surface that can withstand heavy use and various environmental conditions
- More steel results in a high-quality, longer lasting product
- Lifetime warranty

Environment and Health

- PVC-free
- No off-gassing during installation or use
- Epoxy releases no harmful VOCs during production
- Epoxy coating creates minimal waste and is 100% recycled

Aesthetics

- Smooth finish
- Long-lasting color without fading or yellowing over time
- Same baked-on coating used in household appliances

Maintenance

- No maintenance required

Cost

- Competitive pricing without health or environmental risks

Vinyl Coated Shelving

- Less steel is used due to the thickness of the vinyl jeopardizing strength and quality
- As vinyl softens over time, hangers create divots in the vinyl preventing hangers from sliding smoothly
- Life of the shelf is limited due to the yellowing and stickiness of the vinyl coating over time

- Vinyl is a thermoplastic and will continue to soften and off-gas throughout the life cycle of the product
- PVC coated shelving requires plasticizers such as phthalates, used to soften PVC. These phthalates have been linked to asthma, infertility, kidney damage, and liver function. *

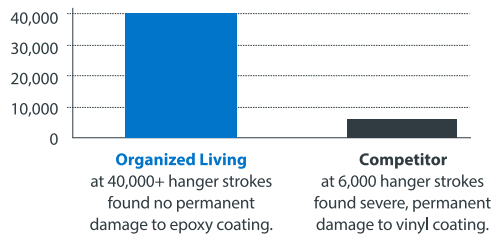

- Vinyl degrades the appearance and quality of the shelf – yellows and becomes sticky over time

- Dust and dirt build up fast, sticking to the softening vinyl as it breaks down, requiring more maintenance

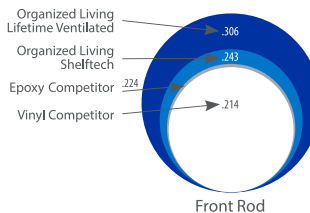

- Lower cost to coat shelving with vinyl

*American Public Health Association (APHA)

EOXY VS VINYL COATING

STEEL WHERE IT COUNTS

43% more steel than competitors with vinyl coating

37% more steel than competitors with epoxy coating

26% more steel than Shelftech

These are true scale comparisons of uncoated rods.
